Date: _____

This library is 35 fill-in tools that walk a park deal from first look to owned asset, plus this spine. No guru claims. No invented data. Print them, take them in the truck, and write on them.

How to use it

1. Read the Journey Map (SP-01). Find the Part that matches where you are.
2. Run the tools in that Part in order. Each tool's Hands to line tells you the next tool.
3. Mark every claim with a letter from the Evidence Status Standard (SP-02): V, B, M, A, C, U.
4. The Decision File (AS-19) collects everything into one call: advance, retrade, pause, or walk.

Brand new? Start with these three

1. AS-02, the 60-Second Deal Screener. It kills a bad deal in a minute, so you never spend a day on one.
2. AS-01, the Walk-Away Pact. It locks your walk-away price before you fall in love with the deal.
3. AS-03, the 27-Question Seller Call Script. It gets the seller talking, so you hear what the package left out.

The two worked examples

Most tools carry a worked example so you can see the math. They use two fictional parks, and the examples say fictional on the page:

- Maple Bend Estates: a 48-lot MHC. Used wherever the math is lot-rent math.
- Pine Hollow RV Park: a 55-site RV park. Used wherever the math is transient-site math.

The names are placeholders. The arithmetic is real, and every number in an example shows its work. Do not use these numbers on a real deal.

Two rules that run through everything

The seller gets zero credit for unrealized upside. You pay for what exists on closing day.

Rules of thumb are labeled as rules of thumb. Anything that varies by state says so and tells you to confirm with your attorney.

SP-01: The Journey Map. SP-02: The Evidence Status Standard. Everything else is an acquisition signal resource, AS-01 through AS-31 plus four RV siblings.

This resource is an organizational tool, not professional advice. Investment, legal, engineering, title, environmental, insurance, tax, and lending decisions belong with qualified professionals.
